## Diecast Enclosures

[www.chk-electronics.com](http://www.chk-electronics.com)

The CHK range of Diecast Aluminum Enclosures are suitable for a variety of uses such as guitar pedals, sensitive electronic equipment and control devices. The very robust allmetal construction is finished in natural Aluminum with the fixing screws and lid supplied unassembled and sealed in plastic to protect the finish. Powder coating, stoved-enamel and silk screen printing is available according to our usual minimum order quantities, please contact our sales office for more information.

### Significant features include:

- Rugged all-metal diecast aluminum alloy construction
- Tough, yet easy to machine
- Standard versions supplied in a natural aluminum finish
- Power Coating, stove-enameling and silk-screen printing available according to our usual minimum order quantities
- Suitable for a variety of uses
